MATRIX

- Control panel for 1 operator, ideal for sliding gates, series
  BULL10M/15M/20M without control panel, equipped
  with encoder, or operator RI.15M
- Simple to install thanks to the integrated display
- Multiple operating logics
- Detection of obstacles and anticrushing protection
  with an innovative electronic system
- Electronic regulation of torque on opening and closing
- Slowing down in opening and closing
- Electronic braking guarantees precise stopping even
  with heavy doors
- Plug in terminals
- Integrated radio receiver 433,92 Mhz, memory capability
  up to 64 codes (programmable code/rolling code)
- Inputs for opening and closing limit switches
- Programmable timer input for management of centralised closures
- Input for 8K2 safety sensitive edge
- Cycle counter
